Aventra Group is now ISO 27001 Certified

Singapore, (January 10, 2023) – Aventra Group has recently achieved certification in the international standard for information security, ISO 27001. This recognition highlights Aventra's commitment to ensuring the security and confidentiality of its clients' data, particularly in the face of the growing threat of data security in the maritime industry.

Maritime cyber threats have become an increasingly pressing concern in recent years, with incidents of ransomware attacks, data breaches, and other forms of cybercrime on the rise. Aventra's ISO 27001 certification demonstrates the company's dedication to implementing robust security measures to protect against these threats and safeguard its clients' valuable information.

Cybersecurity threats and data security breaches can have serious consequences for individuals and organizations. For individuals, the consequences can include financial loss, identity theft, and damage to reputation. For organizations, the consequences can include financial loss, damage to reputation, legal liability, and loss of customer trust.

The direct consequences of a security breach, there can also be indirect consequences such as the cost of responding to the breach, repairing damage, and implementing measures to prevent future breaches. These costs can be significant and can have a lasting impact on an organization's financial health and stability. A security breach can also result in a loss of

competitive advantage, as customers may choose to do business with organizations that have a stronger track record of protecting their data.

"The shipping industry is at a pivotal moment in terms of information security," **said Juan J. Gil – CEO Aventra Digital, Singapore**. *"As the industry continues to digitalize and relies on technology, it is more important than ever to ensure that data is protected. We believe that achieving ISO 27001 certification is just the beginning, and we will continue to prioritize information security in the development of all of our products including AG CARBONDEX."*

In addition to its ISO 27001 certification, Aventra is also committed to staying at the forefront of security technology and best practices in the maritime industry. This includes the development of innovative solutions for detecting and preventing cyber threats, as well as ongoing training and education for its employees on the importance of information security.

With its ISO 27001 certification and commitment to security, Aventra is well-positioned to meet the evolving challenges of the maritime sector and provide its clients with the peace of mind that their data is protected.
